"I stand at the intersection of creativity, technology, and human potential."

— DESIGN PHILOSOPHY

A design leader with over **14 years of experience** shaping digital experiences where design and artificial intelligence converge. I believe great design is no longer just about aesthetics or usability — it's about **intelligence, empathy, and impact**. From envisioning product strategies to leading teams that bring ideas to life, I'm driven by the pursuit of clarity, purpose, and meaning in every interaction. Directing a high-impact design team at **PeopleStrong** to deliver enterprise-grade HR tech for 500+ clients across international markets. I partner closely with CPO and CTO functions to ensure design excellence aligns with technical feasibility and product roadmaps. Successfully led the product design and launch of **two pioneering AI agents** that have redefined digital employee interaction and recruitment workflows in the APAC and Middle East regions.

3 yrs 10 mo · two roles

UX Design Director · Head of UX

- CURRENT
- PROMOTED
- AI BUILDER

- APR 2025 — PRESENT

UX DESIGN DIRECTOR

Now owning design strategy, research ops, the company-wide design system, AI product design, and the ground-up OneXP experience rebuild across the full HR suite.
- AUG 2022 — APR 2025

UX DESIGN HEAD

Joined to rebuild an under-performing design function — grew the team, established critique & sprint rituals, shipped the HRMS redesign that became the company benchmark, and built the first component library. Earned promotion to Director within the first year.

Nearly four years owning UX end-to-end at PeopleStrong — across **10+ enterprise HR products** (HRMS, payroll, talent, learning & development, and workforce analytics) relied on by 500+ organisations in APAC and the Middle East. Scaled the function from a small team into a high-craft design org and led the work below — from the company's first design system to shipped AI products and the OneXP experience rebuild.

AI PRODUCTS BUILT & SHIPPED — 2024 · TRANSFORMING ENTERPRISE HR ACROSS ASIA

- 01

AI CO-RECRUIT AGENT

Conceived, designed, and shipped PeopleStrong's flagship **AI-powered recruitment co-pilot** from zero to enterprise deployment — automating candidate screening & scoring, JD generation, interview scheduling, and AI-driven hiring recommendations. Led full experience: agentic conversation UI, decision-transparency flows, hiring manager dashboards, interviewer briefing, and candidate-facing touchpoints.

↑ 40%+ REDUCTION IN AVERAGE TIME-TO-HIRE ACROSS 100+ ENTERPRISE CLIENTS
- 02

AI ER AGENT — EMPLOYEE RELATIONS

Led end-to-end design of PeopleStrong's **AI Employee Relations Agent** — a conversational AI that autonomously handles grievances, policy queries, disciplinary guidance, and HR escalation routing at enterprise scale. Centred on the hardest challenge: AI experiences that feel genuinely empathetic in emotionally sensitive workplace situations while being efficiently automated.

↑ 60%+ REDUCTION IN HR WORKLOAD ON ROUTINE ER CASES ACROSS SOUTHEAST ASIA

Led the ground-up rebuild of PeopleStrong’s entire product — replacing a fragmented, dated interface with **OneXP**: a single new-age experience language applied identically across every module, fully responsive on web and native on mobile. One system, one feel, end to end.

01 TALENT SUITE

Reimagined the full talent lifecycle — **Performance** (continuous goals & reviews), **Career & Skills** (skills-based growth and internal mobility), and **Succession & Learning** (leadership pipelines tied to in-flow learning) — turning disconnected HR tasks into one guided employee-growth journey.

02 CORE HR & OPERATIONS

Redesigned the operational backbone employees touch daily — **HRIS** (records & self-service), **Attendance**, and **Leave & Exit** — distilling dense enterprise workflows into clear, low-effort flows, including a respectful offboarding experience.

03 ONEXP DESIGN SYSTEM

Built the unifying layer — one component library, interaction model, and visual language shared across all modules — so the product feels identical on desktop, responsive web, and the native mobile app, and ships faster for every squad.

↑ ONE DESIGN LANGUAGE ACROSS 6+ MODULES — WEB-RESPONSIVE & NATIVE MOBILE, PARITY BY DEFAULT

Rebuilt the PeopleStrong mobile app from a clean slate — a fresh, modern look and feel designed around the real moments employees live in on their phone, not a shrunkn copy of the web.

01 EVERYDAY SELF-SERVICE

One-tap **attendance & check-in**, apply-and-track **leave**, payslips, and profile updates — the highest-frequency tasks redesigned for speed, glanceability, and confident one-handed use on the go.

02 MANAGER-ON-THE-MOVE

Approvals, team attendance, and **performance check-ins** surfaced where managers can act in seconds between meetings — clear context, fewer taps, faster decisions.

03 GROWTH IN YOUR POCKET

Bite-size **learning**, skill progress, and career nudges designed for mobile attention spans — making development something employees engage with daily, not quarterly.

- Grew the design team from **3 to 7 designers** — built the full hiring process, critique culture, sprint ceremonies, design reviews, and a career-levelling framework from scratch.
- Redesigned core **HRMS workflows**, cutting user task-completion time by **40%** across web and mobile through research-driven, iterative redesign.
- Evolved the first 60+ component library into PeopleStrong’s **first company-wide design system** (200+ components) — cutting design-to-dev handoff by **35%**.
- Moved product **NPS by +28 points** — established quarterly UX audits and the company’s first structured usability-testing programme with enterprise clients.
- Authored PeopleStrong’s first **Design Vision, Principles & Maturity Framework** — adopted company-wide and referenced in investor materials.

AAKASH EDUCATIONAL

EdTech · India
300,000+ Students
Web & Mobile

User Experience Lead

Led design for India’s largest offline-to-online EdTech transition during COVID-19 — taking Aakash’s entire learning and testing ecosystem digital from scratch for **300,000+ students** across web and mobile while shipping at startup velocity under enterprise constraints. Owned product design end-to-end across four flagship products simultaneously.

PROJECT 01 · WEB & MOBILE

ONLINE TEST PLATFORM

Designed Aakash’s end-to-end **online examination platform** for web and mobile — enabling 300,000+ students to take mock tests, chapter tests, and full-length competitive exam simulations from home. Replicated physical exam rigour digitally: timed sessions, section-locking, answer review, and post-test analytics (rank, percentile, subject-wise). Designed for low-bandwidth conditions across Tier 2/3 India.

PROJECT 02 · MOBILE APP

NEET PREPARATION APP

Led complete UX and UI of the **Aakash NEET Preparation app** — a learning companion for India’s most competitive medical exam. Combined chapter-wise study plans, video lectures, concept revision cards, previous-year question banks, and daily practice tests calibrated to NEET difficulty. Focused on cognitive-load reduction and motivation through streak mechanics and subject mastery visualisations.

PROJECT 03 · WEB & MOBILE

ASK THE FACULTY — LIVE Q&A & DOUBT RESOLUTION

Designed Aakash’s **real-time faculty interaction system** — text chat, FAQ knowledge base, and **live one-on-one or group calls with faculty** directly from within the app. Replaced WhatsApp-group chaos that was the only option for remote students. Full flow from question submission through in-app calling and screen-sharing to post-session tagging.

- Delivered **6 major product releases in 18 months** during rapid COVID digitisation — maintaining design quality through structured sprint processes despite intense delivery pressure.
- Led UX research across student, parent, and teacher mental models — translating insights into product decisions that measurably improved engagement and course completion rates.
- Designed across the full student journey — onboarding, learning, testing, doubt resolution, and performance tracking — creating a cohesive ecosystem rather than disconnected features.

JAN 2020 – JAN 2021

LETSWORK DUBAI

PropTech · Co-working
UAE · GCC
Mobile · Web · Admin

UX/UI Design Consultant

Worked closely with Letswork’s young, creative co-founders to translate their vision into a full digital product ecosystem — conducting deep user research across the UAE market to understand how professionals in the region discover, book, and use flexible workspaces. Delivered three interconnected products: a mobile app, a responsive website, and a partner-facing admin platform.

DELIVERABLE 01 · MOBILE APP

LETSWORK IOS & ANDROID

End-to-end mobile experience unifying co-working, meeting rooms, day offices, studios, and office rentals into one seamless discovery and booking flow.

DELIVERABLE 02 · RESPONSIVE WEBSITE

WEB BOOKING PLATFORM

Fully responsive website — workspace discovery, availability, and booking confirmation across all screen sizes with identical functionality to the mobile app.

DELIVERABLE 03 · ADMIN PLATFORM

PARTNER ADMIN DASHBOARD

Platform for café and hotel partners to manage listings, availability, bookings, and occupancy — designed for non-technical venue managers.

- Conducted **deep user research across the UAE market** to map how professionals in the region discover and book flexible workspaces — insights that directly shaped the information architecture and booking flow.
- Collaborated closely with **young, creative co-founders** through regular working sessions to align the product’s visual and functional identity with their brand vision.
- Designed for **five distinct space types** — co-working, meeting rooms, day offices, studios, and office rentals — each with unique booking logic unified under a single coherent experience.
- Delivered three products — mobile app, responsive web, and partner admin — as a cohesive, consistent ecosystem rather than three separate interfaces.

JUL 2019 – JAN 2020

EMAAR INDIA

Emaar Group · UAE
Entertainment · Cinema
Mobile · Web

UX/UI Design Lead

Emaar owns **Reel Cinemas** — one of the UAE’s most premium cinema brands operating across Dubai and beyond, offering experiences ranging from standard screens to luxury Gold class, 4DX, ScreenX, Dolby Cinema, and the family-friendly Reel Junior. I was brought in to design the digital product ecosystem that would allow UAE audiences to discover, browse, and book movie tickets entirely on their phones and online — eliminating queues and bringing Emaar’s world-class cinema experience into the palm of every moviegoer’s hand.

DELIVERABLE 01 · MOBILE APP

REEL CINEMAS — IOS & ANDROID

Movie browsing by genre/language/actor, real-time showtimes, **interactive seat selection**, secure checkout, and e-ticket generation for UAE’s diverse multi-lingual cinema audience.

DELIVERABLE 02 · RESPONSIVE WEB

WEB BOOKING PLATFORM

Full responsive web platform with dedicated venue pages for Gold, 4DX, ScreenX, Dolby Cinema, and Reel Junior premium formats.

- Designed the **complete seat selection experience** — interactive auditorium maps with real-time availability, seat category differentiation (standard, premium, Gold), and group booking flows.
- Built the **movie discovery architecture** — filtering by genre, language, release date, actor, and location — designed for UAE’s uniquely diverse, multi-lingual cinema audience.
- Designed **promotions and offers surfaces** across both app and web — seasonal campaigns, bank partner discounts, loyalty rewards, and exclusive event ticketing.
- Ensured the premium, luxury feel of the Reel Cinemas brand translated into the digital product — every screen designed to match the standard of the physical cinema experience.

FEB 2017 – DEC 2018

TIMES INTERNET

Times Internet Group

Insurance · Media Visual Design · UX

Sr. Visual & UX Designer

A dual-track role at one of India's largest digital media companies — working across two distinct disciplines simultaneously. Collaborated with the marketing team on high-volume visual design and campaign work for Times Internet's media properties, while also taking ownership of the UX and UI design for **ET Insure**, the group's insurance platform, giving me my first deep exposure to product UX on a transactional, high-trust consumer product.

TRACK 01 · MARKETING

VISUAL DESIGN & CAMPAIGNS

Ad creatives, campaign assets, promotional banners, and email templates at scale — building speed and brand discipline under tight deadlines.

TRACK 02 · PRODUCT UX

ET INSURE — WEBSITE & APP

Full UX and UI for **health, car, bike, and term life insurance** — simplified policy comparison, transparent premiums, reduced drop-off in a low-trust category.

- Designed the complete **insurance product comparison and purchase flow** for ET Insure across four categories — health, car, bike, and term — each with distinct user mental models and decision-making patterns.
- Simplified complex insurance jargon into clear, scannable UI — reducing cognitive load at the most critical drop-off points in the purchase funnel.
- Produced high-volume **marketing campaign visuals** for Times Internet properties — ad creatives, promotional banners, and brand communication assets delivered consistently under tight deadlines.
- Developed strong visual design discipline working across both product UI and marketing simultaneously — building speed, brand sensitivity, and cross-functional collaboration skills.

AUG 2014 – FEB 2017

JABONG · MYNTRA

Fashion E-Commerce India's Top 2 Platforms

Visual & UX/UI Designer

Designed the full fashion purchase funnel — discovery, search, PDP, cart, checkout — across India's two largest fashion platforms. Contributed directly to an 18% uplift in cart-to-purchase rate.

- Contributed to an **18% uplift in cart-to-purchase conversion** through redesigned PDP and checkout flows across Jabong and Myntra.
- Developed reusable UI patterns and a consistent visual language used across both platforms on web and mobile app.
- Built the design rigour and conversion mechanics that have informed every product decision since.

SEP 2010 – AUG 2014

RATEGAIN

Travel & Hospitality Tech B2B SaaS Career Beginnings

Executive Creative Services

* CAREER ORIGIN

Where it all began. Joined RateGain fresh out of college as a Graphic and Visual Designer and spent **four formative years** building the design foundations that underpin everything I do today — from visual craft and brand communication to my first exposure to product thinking and digital interface design in a B2B SaaS environment.

- Designed across brand identity, marketing collateral, UI screens, and digital communications for RateGain's travel and hospitality SaaS products — building core visual craft from the ground up.
- First hands-on exposure to **product UI design** — worked alongside product and engineering teams to design screens for B2B SaaS dashboards, learning how design decisions translate into real software.
- Developed rigorous attention to typography, colour systems, and visual hierarchy that shapes every design decision to this day.
- Grew from junior graphic designer to leading creative output for multiple product lines over four years — establishing the work ethic and discipline that define my practice.

How I Think

01

UNDERSTAND & DISCOVER

Deep empathy before a single pixel. Stakeholder mapping, user interviews, and behavioural research to uncover the real problem beneath the surface request. This step is never optional.

02

BRAINSTORM & SOLVE

Structured ideation, rapid prototyping. Make decisions visible and discussable before they're expensive to change in code. Diverge widely — then converge on what's genuinely right.

03

TEST & VALIDATE

Design is a hypothesis — proved by user behaviour and measurable outcomes, not by opinion, seniority, or the loudest voice in the room. Test, measure, decide.

04

SCALE & REPEAT

Build systems, not one-off screens. Document, componentise, share — so good design multiplies across the organisation. Seek criticism over praise, always.
